

Previous Update: 2024 South Forestview Area Improvements

Project Update - March 1, 2024

A general update for residents is to note is that a contractor has hauled in equipment to the neighborhood to get ahead of pending road restrictions in the area. This was done "at risk" by the Contractor. The project timeframe is dependent on Council Action at the Assessment Hearing and subsequent Council Meetings. Formal notices and additional communication will occur ahead of construction starting in the area.

Tree Removal Notice: Winter tree clearing has been completed on a portion of property near Maryland Road and Forestview Drive this week. The Contractor for this work was Shawn Fletcher Trucking, Inc., a local tree clearing contractor. The tree clearing was completed in an area that is intended to be developed in the future. The intent is for the project contractor to use this area as a staging area for equipment and material during the upcoming road project.
